

## State of Connecticut JOB POSTING

- POSTED:** March 14, 2014
- POSITION:** **INSTRUCTOR OF MANUFACTURING TECHNOLOGY – REOPENED SEARCH**  
Full-time, 10-Month, Tenure-Track Position
- ANTICIPATED START DATE:** Fall 2014
- MINIMUM QUALIFICATIONS:** Master's Degree in field closely related to manufacturing together with two to five years of related experience. ***Applicants with who do not meet the minimum qualifications as stated are encouraged to put in writing precisely how their background and experience have prepared them for the responsibilities of this position and by providing appropriate references.***
- The successful candidate should: demonstrate a passion for teaching manufacturing and industrial technology courses; be able to utilize a media-rich classroom and manufacturing laboratory; demonstrate effective teaching techniques to address the needs of a diverse student body with an array of learning styles; be able to teach courses in CAD, manufacturing processes, machining, blueprint reading, CNC, and mathematics. S/he should also demonstrate excellent teaching, technical, communication and interpersonal skills; exercise good judgment and tact conducive to a collegial environment; demonstrate effective participation and success in creative and collaborative group projects; and use word processing software, the Internet, and e-mail. Successful candidate must also have at least five years of documented professional experience in manufacturing.
- These skills and abilities are typically acquired through:
- a combination of education, training and experience which would include a Master's degree in a field related to the teaching content of the programs' subject areas together with two to five years of work experience in a related field leading to expertise in the subject areas
- OR**
- a combination of education, training and experience which would lead to the competencies required for successful performance of the position's essential duties.
- PREFERRED QUALIFICATIONS:** Two years of experience teaching CAD, manufacturing processes, machining, blueprint reading, and/or CNC at the college level. Evidence of successful course development and innovative teaching techniques. Experience in developing courses that will prepare students for employment in manufacturing or transfer to a baccalaureate engineering program. Experience teaching at a Community College is also preferred.
- RESPONSIBILITIES:** This instructor is expected to teach twenty-four credit hours each academic year in the area of manufacturing. In addition, responsibility for the smooth operation of the machining lab is required. This includes tracking and ordering of consumables and responsibility for maintenance and repair of all equipment. Other responsibilities include: development of manufacturing courses that will prepare students for employment in manufacturing or transfer to a baccalaureate manufacturing or industrial technology program; advising students, and mentoring students interested in manufacturing and engineering careers; developing and participating in special college projects; developing new instructional techniques and courses; participating in faculty and department meetings; attending workshops and conferences to maintain currency in the profession; participating in other college and community service activities consistent with the mission of the College and the Connecticut Community College System. This instructor is also required to participate in commencement and convocation activities as well as special college meetings. The teaching schedule may include evenings and/or weekends.
- SALARY:** \$50,610.00 approximate annual salary, with full benefits package.
- TO APPLY:** **Submit a letter of interest, current resume and completed (typed) Connecticut Community College Employment Application\* to:**
