The ASSA ABLOY Education Solutions Showroom presents an overview of applications that answer the needs of a single-building K-12 school to the challenges posed by a town-sized college/university campus. Explore openings that address complex life safety and security issues, including:

- Security technologies ranging from simple mechanical locks to the latest highly intelligent locking solutions
- Classroom security locks and security sidelight doors for enhanced lockdown capabilities
- Windstorm openings that protect against hurricanes and tornados
- STC-rated openings that block sound transmission
- Software offerings for campus-wide access control
- Power over Ethernet locks and energy efficient openings that address sustainable building needs
- Decorative doors and hardware for aesthetic design
